The **Sebo electric power brush** is engineered to deliver optimum performance with exceptional cleaning ability. This high quality precision-made power brush can be added to any vacuum to greatly enhance its cleaning performance. Sebo electric power brushes are made to withstand heavy use on all types of carpets in commercial and residential applications. The following features set this exceptional electric power brush above all others:

- The geared belt drive on the power brush maintains direct power to the brush roll without slippage.
- Sebo has designed an electronic sensor system to protect this belt drive mechanism and the motor by having the power brush turn off should the brush roll become jammed. Operation is restored by simply clearing the brush roll. This sensor also detects the need for a brush strip replacement.
- The brush strip is easily removed and replaced at minimal cost.
- Heavy duty motor has a large armature for more power and longer life.
- Balanced brush roll produces a smoother operation.
- 14" Cleaning base designed for incredible edge cleaning.
- L-shaped design provides easy manoeuvring around furniture.
- On/Off micro switch is located in the handle.
- Sebo seals the dirt away from the motor and the belt drive assembly, prolonging their life.
- With all these features **NOW** is the time for you to experience this exceptional electric power brush.
